Professional Summary

Immediate Joiner

Full-Stack Developer with **2.7 + years of experience** in building scalable web applications using **Node.js, NestJS, and React.js**. Strong expertise in designing and developing **RESTful APIs**, integrating frontend and backend systems, and working with **MongoDB and MySQL** databases. Hands-on experience in deploying applications on **Vercel and Netlify**, ensuring performance and reliability. Proven ability to collaborate with cross-functional teams, follow clean architecture principles, and deliver high-quality solutions within deadlines.

Technical Skills

- **Backend Technologies:** Node.js, NestJS, Express.js
- **Frontend Technologies:** React.js
- **Databases:** MongoDB, MySQL
- **API Development & Testing:** RESTful APIs, Postman
- **Deployment & Hosting:** Vercel, Netlify

Work Experience

Full-stack Developer.

Mar 2025 – Present

Creedom (Formaly known as - Casttree) Company Type: (Product Based)

Project: Crredom (Mobile Application)

Roles & Responsibilities

- Developed and maintained scalable backend applications using **Node.js** and **Nest.JS**, following modular and clean architecture principles.
- Built responsive and reusable frontend components using **React.js**, ensuring smooth user experience.
- Designed and implemented **RESTful APIs**, ensuring proper validation, authentication, and error handling.

- Worked with **MongoDB** and **MySQL** to design schemas, write optimized queries, and manage data efficiently.
- Integrated frontend applications with backend APIs using Postman for testing, debugging, and API validation.
- Implemented **CRUD** operations and business logic across full-stack applications.
- Deployed and managed applications on **Vercel** and **Netlify**, handling environment configurations and build processes.
- Collaborated with cross-functional teams to understand requirements and deliver features on time.
- Followed best practices for code quality, performance optimization, and version control.

Junior Software Engineer

Mar 2022 – Mar 2025

Vimix Technology Private Ltd Company Type: (Product & Service Based).

Roles & Responsibilities

Worked as a Junior Software Engineer involved in full-stack development across multiple projects.

Developed RESTful backend APIs using **Node.js** and **Express.js**. Built responsive and user-friendly web interfaces using **React.js**. Designed and managed relational data using **MySQL**.

Collaborated with team members to understand requirements and deliver features for both product-based and service-based projects.

Performed manual **API testing**, debugging, and issue fixing to ensure application stability. Followed best practices for clean code, component reuse, and API structure.

Project Details

Project 1: CodePurple (Product Website)

Developed backend REST APIs using **Node.js** and **Express.js**. Designed and maintained database schemas using **MySQL**.

Worked on frontend UI/UX implementation using **React.js**. Integrated frontend and backend for smooth data flow and user experience.

Project 2: HireIn5 (Service-Based Project)

Built dynamic and reusable **React.js** components for web pages. Developed RESTful APIs using **Node.js** to support frontend functionality. Collaborated with stakeholders to implement client-specific requirements.

Education 2019 - 2022 Bachelor's Degree at Bharathiar University.
